Pharmacy and Therapeutics (P&T) is a committee at a hospital or a health insurance plan that decides which drugs will appear on that entity's drug formulary. The committee usually consists of healthcare providers involved in prescribing, dispensing, and administering medications, as well as administrators who evaluate medication use. They must weigh the costs and benefits of each drug and decide which ones a person and the most efficacy per dollar. This is one aspect of pharmaceutical policy.

Clinical pharmacy is the branch of pharmacy in which clinical pharmacists provide direct patient care that optimizes the use of medication and promotes health, wellness, and disease prevention. Clinical pharmacists care for patients in all health care settings but the clinical pharmacy movement initially began inside hospitals and clinics.
