Key Concepts for Understanding Curriculum is an invaluable guide for all involved in curriculum matters. Now fully updated, this revised and enlarged fourth edition not only provides a solid grounding in the subject but also covers the latest trends and issues affecting the field. Written in Marsh’s clear and accessible style, the book details the strengths, weaknesses and controversies around major concepts in curriculum, including

- curriculum planning and development
- curriculum management
- teaching perspectives
- collaborative involvement in curriculum
- curriculum ideology.

Now updated with new chapters on curriculum models, school-based curriculum development, learning studies, ICT developments in assessment, the new edition includes extra detail on standards and essential learning factors that have recently been introduced in a number of countries, including the UK, USA and Australia. This up-to-date edition of a definitive text will be essential reading for anyone involved in curriculum planning or development. It will be especially useful to students training to be teachers, and practising teachers following professional development programmes.

Colin J. Marsh is Adjunct Professor at Curtin University, Western Australia. He has been involved in teaching at all levels, from primary school to university, over many years. He has written over thirty books on teaching and learning, including in the areas of curriculum planning, development and evaluation.
The Teacher’s Library
Series Editor: Professor Ivor F. Goodson, Warner Graduate School, University of Rochester, USA and Applied Research
in Education, University of East Anglia, Norwich, UK
The prime intention of The Teachers’ Library is to provide impetus and support to analytical and research-oriented
teaching practice. Each book in the series has been written to satisfy the needs of teachers wishing to study education and
reflect upon their own practice.

Search and Re-search
What the inquiring teacher needs to know
Rita S. Brause and John S. Mayher

Doing Qualitative Research
Circles within circles
Margot Ely, Margaret Anzul, Teri Freidman, Diane Garner and Ann McCormack

Beginning Qualitative Research
P. Maykut and R. Morehouse

Becoming a Teacher
Gary Borich

Participatory Evaluation in Education
J. Bradley Cousins and Lorna M. Earl

Schooling for Change
Andy Hargreaves and Lorna M. Earl and J. Ryan

Studying School Subjects
Ivor F. Goodson and Colin J. Marsh

On Writing Qualitative Research
Living by words
Margot Ely, Ruth Vinz, Maryann Downing and Margaret Anzul

Subject Knowledge
Readings for the study of school subjects
Ivor F. Goodson with Christopher J. Anstead and J. Marshall Mangan

Fundamentals of Education Research, new edition
Gary Anderson

Students as Researchers
Creating classrooms that matter

# Curriculum frameworks

4 Curriculum frameworks

- **Introduction**
- What is a curriculum framework?
- Frameworks produced by theorists and educators
- Recent approaches
- Features of curriculum frameworks
- Impact upon teachers
- Examples
- Concluding comments
- Reflections and issues
- Web sources

## Objectives, learning outcomes and standards

5 Objectives, learning outcomes and standards

- **Introduction**
- Objectives
- Outcomes
- Standards
- The relative merits of objectives, outcomes and standards
- Types of objectives
- Behavioural objectives
- Instructional objectives
- Classifying objectives
- Concluding comments
- Reflections and issues
- Web sources

## Selecting and organizing teaching and learning modes

6 Selecting and organizing teaching and learning modes

- **Introduction**
- Matching teacher and student priorities
- Making use of technology
- Impact of standards on teaching and learning modes
- Teaching and learning modes
- Examples of modes
- Cooperative learning
- On-line teaching
- Concluding comments
### 7 Assessment, grading and reporting
- **Introduction**
- **Assessment**
- **Reasons for assessment**
- **Assessing for whom?**
- **Important emphases in assessment**
- **Assessment for learning**
- **Assessment: value continua**
- **Commonly used assessment techniques**
- **Trends in reporting**
- **New developments in assessment and reporting**
- **Concluding comments**
- **Reflections and issues**
- **Web sources**

### 8 Curriculum implementation
- **Introduction**
- **Definitions and terms**
- **Influences on implementation**
- **Problems of describing/measuring implementation**
- **Measuring student activities and achievements**
- **Measuring use of curriculum materials**
- **Measuring teacher activities**
- **Research on implementation**
- **Fidelity of implementation**
- **Adaptation in implementation**
- **Mutual adaptation**
- **The continuing debate: fidelity of use versus mutual adaptation in the 1990s and beyond**
- **Specific examples of curriculum implementation**
- **Concluding comments**
- **Reflections and issues**
- **Web sources**

### PART III  Curriculum management
- **Innovation and planned change**
  - **Introduction**
  - **Some basic terms**
The process of educational change 115
Change leaders 118
Diffusion and dissemination 119
Change strategies and tactics 120
Contexts of innovations 124
Models of change 124
Which innovations last? 125
Reflections and issues 126
Web sources 127
10 Leadership and the school principal 128
Introduction 128
Functions and standards 131
Leadership qualities and styles 132
Transformational leadership 132
Concluding comments 135
Reflections and issues 136
Web sources 136
11 School-based curriculum development: idealized or actual? 137
Introduction 137
Some basic terms and issues 137
Conceptual analysis of SBCD 142
Processes in a school to support SBCD 148
Concluding comments 149
Reflections and issues 150
Web sources 150
12 School evaluations/reviews 151
Introduction 151
Some basic terms 151
Purposes 154
Persons involved 159
Concluding comments 160
Reflections and issues 160
Web sources 161
13 Curriculum reform 162
Introduction 162
What is curriculum reform? 162
Ideology and reform 163
Reform reports 164
Examples 165
Comprehensive school reform programmes 167

Preface
Reynolds (2003) uses various metaphors to describe curriculum – lines of flight; a river runs through it – and to express images of inspiration, movement, continuity and integration. Glatthorn and Jailall (2000) also use the metaphor of curriculum as several streams flowing through the system ‘ebbing at times, then gathering strength and flowing together in a dynamic confluence’ (p. 98). By contrast, Wright (2000) describes curriculum in more chaotic but cutting-edge ways. He argues that it is problematic to categorize the field of curriculum – ‘as difficult as attempting to nail Jell-O to a wall’ (p. 12). There continues to be much interest in curriculum matters – a range of very different theoretical discourses continue to be widely discussed. Major initiatives by governments and politicians to exert their respective stamps on what they consider to be essential learning and standards have appeared (and sometimes reappeared).
As we close out the final years of the first decade of the twenty-first century we should reflect on these heady days. There is an international interest in the OECD’s Programme for International Student Assessment (PISA) rankings between countries. Ambitious, large-scale curriculum reforms have been initiated in a number of countries, especially the UK and the USA and also in Singapore and Hong Kong. The results to date have demonstrated some short-term successes but long-term issues still have to be resolved.
The players who are taking leading roles in policy formulation are changing, with increasing pressures coming from politicians and employer groups, as well as from community interest groups, parents, teachers and students. A number of these individuals and groups have very limited understanding of curriculum theories, principles and processes, even though they are prepared to commit enormous amounts of funds and energy to advance their preferred solutions to specific curriculum problems.
Key Concepts for Understanding the Curriculum is aimed at assisting various personnel concerned about and involved in curriculum decision-making. Of course, a major clientele are those pre-service teachers who will be commencing full-time careers in schools, namely students who are taking teacher
education degrees (BA (Education), Bachelor of Education, Diploma of Education, Diploma of Teaching and PGCEs). Another major group who are likely to be very interested in the book include those practising teachers who are embarking upon professional development programmes. Parents and community members involved as school governors and members of school councils, boards and districts will obtain considerable assistance from the succinctly stated commentaries about major curriculum concepts.

The book provides details about twenty-one major concepts in curriculum. In such a small space each chapter cannot provide an exhaustive treatment of each concept, but every attempt has been made to highlight major features, controversies, strengths and weaknesses. In particular, the follow-up questions and web sources challenge the reader to reflect further upon specific issues relating to each concept and there is a listing of recent references at the end of the book.

I acknowledge various colleagues in curriculum, both within Australia and in the United Kingdom, the United States of America and Canada, who have helped me hone my ideas over the decades about curriculum. They include Michael Fullan, Gene Hall, Paul Klohr, Michael Huberman, Elliot Eisner, Bill Reid, Helen Simons, Kerry Kennedy, Eric Hoyle, Ray Bolam, Michal Connelly, Christine Deer, David Smith, Noel Gough, Chris Day, Ivor Goodson, Brian Caldwell, Paul Morris, David Tripp and John Elliott.

The fourth edition includes a number of new concepts which are having considerable impact during the twenty-first century.

For permission to reproduce figures and tables I am most grateful to Patricia Broadfoot, Brian Caldwell, Chris Day, Stephen Kemmis and Barry Fraser. A special word of thanks is due to Suzanne Stocker for her expert secretarial assistance in the preparation of the manuscript.

Part I
Introduction
Key Concepts for Understanding the Curriculum is aimed at assisting various personnel concerned about and involved in curriculum decision-making. Of course, a major clientele are those pre-service teachers who will be commencing full-time careers in schools, namely students who are taking teacher training. He had been involved in teaching at all levels, from primary school to university, over many years. He has written over 30 books on teaching and learning, including in the areas of curriculum planning, development and evaluation.

This text refers to an out of print or unavailable edition of this title. From the Publisher. Colin J. Marsh is Adjunct Professor at Curtin University, Western Australia. He had been involved in teaching at all levels, from primary school to university, over many years. He has written over 30 books on teaching and learning, including in the areas of curriculum planning.
