John Locke

*Essay Concerning Human Understanding*, Book IV

**Locke's conception of knowledge**

“*Knowledge then seems to me to be nothing but the perception of the connexion and agreement, or disagreement and repugnancy of any of our Ideas. In this alone it consists*” (IV.I.2).

Kinds of connection between ideas:

A1.

A2.

A3.

A4.

Degrees of knowledge (starting with the most certain):

B1.

B2.

B3.

Five limits of our knowledge:

C1. We have no knowledge where:

C2. We have no knowledge where:

C3. We have no intuitive knowledge where:

C4. We have no demonstrative knowledge where:

C5. We have no sensitive knowledge where:

D1. Why are simple ideas real?

D2. Why are complex ideas real (excepting complex ideas of substances)?
Descartes vs. Locke, again

Compare and contrast Descartes and Locke on the following questions:

E1. Are there innate ideas? And what kind of thing would an innate idea be? (Think here of the dialectic about universal consent.)

E2. How do universal ideas—e.g. ideas like \textit{UNITY} and \textit{EXISTENCE} that accompany every representation—relate to innate ideas? (Think here of the lecture from Thursday, 19 February.)

E3. What are the characteristic objects of our knowledge? That is, what are the kinds of thing that we know? (Think here of Descartes’ and Locke’s thoughts on our knowledge of substances vs. our knowledge of modes or qualities.)

E4. Through what faculty of mind do we know the characteristic objects of our knowledge?

E5. What is the root of our knowledge—that is, what form of knowledge is most certain? (Think not of particular claims like “I exist” or “God is infinite,” but the way we know these things.) And: how can we extend our knowledge from the most certain forms to less certain forms?

For each of these questions: do you find Descartes or Locke more convincing? Why?
An Essay Concerning Human Understanding - Part 1. PREFACE by the EDITOR. The person chiefly concerned in improving this edition of Mr. Locke’s works, having long entertained an high esteem for that author’s writings, and being informed that a new edition of them was preparing, became naturally desirous of seeing one more complete than any of the foregoing; and of contributing his assistance towards it (so far as the short time allowed for). Beside those abovementioned, there is a Common-place Book to the Bible, first published in 1693, and afterwards swelled out with a great deal of matter, ill digested, and all declared to be Mr. Locke’s; but whatever hand he might be supposed to have in the original book itself, it is plain he had none in that preface, which is neither sense.

An Essay Concerning Human Understanding is a work by John Locke concerning the foundation of human knowledge and understanding. The essay was one of the principal sources of empiricism in modern philosophy, and influenced many enlightenment philosophers. Essay Concerning Human Understanding. John Locke. Study Guide. Perhaps most provocatively, at II.xxiii.2 he compares the idea of a substratum to the explanatory tool of an Indian philosopher who, “saying that the world was supported by a great elephant, was asked what the elephant rested on, to which his answer was a great tortoise. Being again pressed to know what gave support to the broad-backed tortoise, he replied, something he knew not what.” This mocking analogy seems to suggest that Locke considers “substratum” an entirely empty word, referring to nothing but our own limit of understanding. At the same time, Locke retains the id...
Essay concerning Human Understanding tries to identify the various faculties of our mind, and how ideas are formed. Thus, we may discover the limits of knowledge, and therefore, we can identify an area of thought where truth is attainable, and another where this is impossible. This is the best way for Locke to fight against skepticism, which doubts the possibility of achieving any truth whatsoever: it is to be thinner than the radical doubt, and to identify the type of idea on which it is legitimate doubt, and the type of idea that resists it. Hobbes vs Locke is one of the top debates in philosophy. An Essay concerning human Understanding Book I: innate ideas. In the first book, Locke attacks the doctrine of innate ideas, found in Descartes. Start by marking "An Essay Concerning Human Understanding, Book II" as Want to Read: Want to Read saving… Want to Read. Can the soul think, and not the John Locke wrote four essays on human (or humane) understanding. Here are a few quotes from the book: "I see no reason to believe, that the soul thinks before the senses have furnished it with ideas to think on. The dreams of sleeping men are, as I take it, all made up of the waking man's ideas, though for the most part oddly put together. Book Summary. About An Essay Concerning Human Understanding. Having developed in Book I his argument concerning the nonexistence of innate ideas, Locke undertakes in Book II to describe in detail the process by means of which ideas come to be present in human minds. His fundamental thesis is that experience alone is adequate to account for all the ideas included in anyone's store of knowledge. Chapter xxxiii: The association of ideas. An Essay Concerning Human Understanding Book II: Ideas. John Locke. Copyright © Jonathan Bennett 2017. It is widely believed that men have ideas stamped upon their minds in their very first being. My opposition to this in Book I will probably be received more favourably when I have shown where the understanding can get all its ideas from an account that I contend will be supported by everyone's own observation and experience. 2. Let us then suppose the mind to have no ideas in it, to be like white paper with nothing written on it.
truths can be imprinted on the understanding without being perceived I can see no difference there can be between any truths the mind is capable of knowing in respect of their original: they must all be innate, or all adventitious; in vain shall a man go about to distinguish them. He therefore that talks of innate notions in the understanding, cannot (if he intend thereby any distinct sort of truths) mean such truths to be in the understanding as it never perceived, and is yet wholly ignorant of. The person chiefly concerned in improving this edition of Mr. Locké’s works, having long entertained an high esteem for that author’s writings, and being informed that a new edition of them was preparing, became naturally desirous of seeing one more complete than any of the foregoing; and of contributing his assistance towards it (so far as the short time allowed for. Beside those abovementioned, there is a Common-place Book to the Bible, first published in 1693, and afterwards swelled out with a great deal of matter, ill digested, and all declared to be Mr. Locké’s; but whatever hand he might be supposed to have in the original book itself, it is plain he had none in that preface, which is neither sense.
Essay concerning Human Understanding tries to identify the various faculties of our mind, and how ideas are formed. Thus, we may discover the limits of knowledge, and therefore, we can identify an area of thought where truth is attainable, and another where this is impossible. This is the best way for Locke to fight against skepticism, which doubts the possibility of achieving any truth whatsoever: it is to be thinner than the radical doubt, and to identify the type of idea on which it is legitimate doubt, and the type of idea that resists it. Hobbes vs Locke is one of the top debates in philosophy. An Essay concerning human Understanding Book I: innate ideas. In the first book, Locke attacks the doctrine of innate ideas, found in Descartes. An Essay Concerning Human Understanding is a work by John Locke concerning the foundation of human knowledge and understanding. It first appeared in 1689 (although dated 1690) with the printed title An Essay Concerning Humane Understanding. He describes the mind at birth as a blank slate (tabula rasa, although he did not use those actual words) filled later through experience. The essay was one of the principal sources of empiricism in modern philosophy, and influenced many enlightenment philosophers. In Book II of the treatise, Locke argues that all knowledge is derived from experience.
According to Locke, the first capacity of human intellect is:

a) that the mind is fitted to receive impressions made on it
b) that the mind is the object of thinking
c) sensation
d) reflection.

Locke writes that our knowledge is founded in:

A) Memory
B) Literature
C) Community
D) Experience.

“The mind thinks in proportion to the matter it gets from _ to think about.”

A. illusions
B. thoughts
C. experience
D. itself.

According to Locke, the beginning of man's ideas is the beginning of:

a. his life
b. his soul
c. his memory
d. his sensations.

According to Locke's essay, as the mind by the senses

Having developed in Book I his argument concerning the nonexistence of innate ideas, Locke undertakes in Book II to describe in detail the process by means of which ideas come to be present in human minds. His fundamental thesis is that experience alone is adequate to account for all the ideas included in anyone's store of knowledge. Essay Concerning Human Understanding. John Locke. Study Guide.

Perhaps most provocatively, at II.xxiii.2 he compares the idea of a substratum to the explanatory tool of an Indian philosopher who, "saying that the world was supported by a great elephant, was asked what the elephant rested on, to which his answer was a great tortoise. Being again pressed to know what gave support to the broad-backed tortoise, he replied, something he knew not what." This mocking analogy seems to suggest that Locke considers "substratum" an entirely empty word, referring to nothing but our own limit of understanding. At the same time, Locke retains the idea in his picture.
