The World's Rarest Birds has introductory chapters that explain the threats to birds, the ways threat categories are applied, and the distinction between threat and rarity. The book is divided into seven regional sections—Europe and the Middle East; Africa and Madagascar; Asia; Australasia; Oceanic Islands; North America, Central America, and the Caribbean; and South America. Each section includes an illustrated directory to the bird species under threat there, and gives a concise description of distribution, status, population, key threats, and conservation needs. This one-of-a-kind book also A new book, The World's Rarest Birds, catalogs all of these species. Each species is shown with remarkable color-photography and illustrations. Threats to species habitat are described, population estimates per species are given, and each species has a quick response (QR) code that takes the reader to a species-specific BirdLife International webpage. The book also covers 60 Data Deficient species. A The World's Rarest Birds also employs the illustration skills of acclaimed wildlife artist Tomasz Cofta to describe 75 species where there are no known photographs in existence. El Oro Parakeet (Pyrrhura orcesi) © Greg & Yvonne Dean. El Oro Parakeet (Pyrrhura orcesi) population estimate 250 to 999.
